

KÖGEL

NOVUM: LIGHT & STRONG

KÖGEL TIPPER TRAILERS

PASSIONEERING FOR OUR CUSTOMERS

What could be more exciting than the transport sector? The future of the transport sector! Based on experience, we believe that profitability needs to be rethought again and again in order to be optimised. That's why we dedicate all our passion and energy to doing so. The competitive pressure on you, our customer, is constantly growing. We want to take some of this pressure off. Our commitment goes beyond the daily transport of goods with our innovative trailers. A close, collaborative partnership with you is the source of all innovation. Only then can we quickly identify your changing needs and requirements – and get the right solutions on the road. That's where German engineering comes in, which we have loyally practised for over 80 years. This includes our commitment to uncompromising quality and our dedicated, professional team.

From practice to theory, to the plan and back into practice. Passioneeering never stops! All your challenges feed directly into the development of our trailers. We subject our innovations to intensive testing, far beyond the usual requirements. Extreme driving manoeuvres, heavy loads, poor road surfaces, rain, ice, snow and scorching sun – our trailers have to withstand it all without a hitch. Only then are we satisfied – for now, at least. And only then can we be sure that you too, our discerning customer, are satisfied with our trailers. But the end of every development process is only the beginning of something new. After all, everything we do is with the future of the transport sector in mind. And we have dedicated all our passion and energy to it!

**FULLY INSULATED:
ASPHALT TIPPER TRAILERS 6**

KÖGEL TIPPER TRAILERS

**DURABLE IS THE NEW COST-EFFICIENT.
BECAUSE WE CARE!**

Make your construction company's vehicle fleet fit for the future! With the Kögel tipper trailer, you are perfectly equipped for the transport of bulk materials. The highly stable Kögel tipper trailer is built from high-strength steel and is noted for its low maintenance costs, good driving characteristics and practical operating controls.

Thanks to its low tare weight, the tipper trailer offers maximum payload for all kinds of bulk materials. This is the result of the state-of-the-art production technology used in the construction of the Kögel tipper trailer. Replacing individual components on the modular steel body, for example, is now easier than ever.

Features:

- ✓ **Impressive resistance**
- ✓ **Application-oriented material composition**
- ✓ **High service-friendliness**

Our solution for your industry:

Bulk materials | Demolition | Construction sites | Roadwork

Roll-up cover with control pedestal (optional)

Electrical tipper cover (optional)

Intuitive control unit

Hinged underride guard

Tilt cylinder

Practical connection rail for air and electrics

KÖGEL ASPHALT TIPPER TRAILERS

Two-axle and three-axle Kögel tipper trailers with a 24 m³ load capacity can also be provided with a fully insulated thermal tipper body in all the available wall and tipper body thicknesses. Naturally, Kögel asphalt tipper trailers already have a 170 mm extension of the body overhang, which Kögel introduced in 2014. The asphalt tipper semi-trailer is therefore perfectly suited to road paving.

An optionally attachable chute is no longer necessary.

This not only saves our customers money, but also weight. The lamp holders can be separated from the mudguard holders and can therefore be easily and quickly adjusted in height to get more distance from the asphalt or the paving machine.

Features:

- ✓ **Impressive resistance**
- ✓ **Application-oriented material composition**
- ✓ **High service-friendliness**

Our solution for your industry:

Roadwork | Bulk materials

Electrical tipper cover (optional)

Temperature sensor

Hinged underride guard

Bluetooth printer (optional)

Intuitive control unit

Temperature display

Pull-out access ladder (optional)
